Sanitary Sewer Overflow Prevention & Response Plan

A best practices guide for the development and implementation of a Sanitary Sewer Overflow Prevention and Response Plan (SSOPRP) that will help your agency to:

- Eliminate your system's preventable SSOs
- Understand current regulatory requirements
- Ensure timely corrective action is taken
- Develop a clear and consistent SSO prevention & response

Overflowing with information including:

- ◆ SSO Prevention Plan
- ◆ SSO Response Plan
- ◆ Regulatory References
- ◆ Benchmarking Metrics
- ◆ SSOPRP For Construction Projects
- ◆ SSO Volume Estimation Templates and Techniques
- ◆ Grease Prevention Best Management Practices

Developed by the Collection System Collaborative Benchmarking Group

The Collaborative Benchmarking Group is six California public wastewater utilities with responsibilities for the operation and maintenance of wastewater collection systems. These agencies have compared and improved their performance through the use of metrics, process benchmarking and the development of best practices for various elements of the maintenance, operation and management of the wastewater collection system.

Let their experience work for your agency.
