Spring is in the air and what a great time of year it is, it is also the time of year when CWEA TRIS Board of Directors change seats and job duties. I want to thank all the people that made this possible for me to be the 2012-2013 Incoming President. I am looking forward to continuing to work with our current Board of Directors and chairs while tackling the challenges ahead. This will be my sixth year being involved with CWEA and it has been great working with our current Board and all of the Past Presidents and chair members. This has been a great learning experience and career building tool for me and let me tell you if you’re not involved with CWEA in some manner you are missing out on some great opportunities and a lot of fun.

We started the year off with the March workshop hosted by Carpinteria Sanitary District, and I have to say they are great hosts and really know how to organize a great workshop. There is a lot of work involved in putting on a workshop so let me say thanks to all of the people involved, All of the staff at Carpinteria San for hosting and all the set up, The Iron Chefs from Goleta Sanitary District for a fabulous BBQ lunch, CWEA BOD and Chairs, our CWEA Liaison Barbara Langley, all of the trainers who selflessly give their time to share their knowledge, Louis Chiourn for the great flyers and class schedules, and all of our vendors for the support they give us throughout the year for all of our events.
President’s Message (continued from page 1)

Our next training event will be the June Plant of the Year workshop and will be hosted by the 2011 medium size plant of the year winner The City of Simi Valley WQCP. This workshop will focus on technical certification preparation. If you are getting ready to take your certification exam this workshop will be helpful or if you have certification and would like to be a trainer please contact our TCP chair Jim Langley at jlangley@simivalley.org.

Looking forward to seeing you all in June and thank you for the opportunity to serve on this year’s Board of Directors.

Outgoing President’s Message

By Bradshaw Pruitt

I hope my final message as your CWEA Tri-Counties Section President finds all our esteemed members and associates well and in good spirits. It has been my absolute pleasure and indeed an honor to serve my fellow members and be associated with such a great group of professionals. As Past President I will be coordinating the Awards Banquet in January 2013, so as we get closer to the event be sure to nominate those folks deserving an award as I know there are many.

We are a strong highly regarded section which I attribute to our members desire to pursue industry related training, agencies supporting their staff’s training needs, and Board Directors, committee chairs, and other volunteers coordinating and setting up training and events. A huge amount of vendor support is our foundation with which we could not do without.

If you are new member of CWEA or the Tri-Counties Section, Welcome! If you are a section member who has not attended our training events, a student or person with a desire to learn more about CWEA, our Section, or wastewater industry training, please join us at our events!

Certainly the main attraction for me is the people, the fun, and the personal and professional growth opportunities. As we move ahead I encourage all to take advantage of CWEA’s certification program which is a great benefit and I thank you for the opportunity to serve the CWEA and the Tri-Counties Section.
SL100 Portable Monitor and Data Logger
D&D Engineering brings together a complete measurement and monitoring system. Deploy and loop powered sensor with the data logger for up to 3 weeks.

- Level Measurement – Ultrasonic Level Transmitter
- Level Measurement – Submersible Pressure Transmitters
- Pressure Measurement
- Position Measurement – Cable Extension Transmitters
- Analytical Measurements – pH/ORP and Conductivity

Training Topics Needed: We have two more workshops in 2012 and I want to do my best to make sure you are getting the training that you want and need. So, today, I’m looking for feedback from YOU!

If you are going to sit in a training class for 50 minutes, what topics intrigue you most?

Please take 5 minutes to consider the following questions and e-mail me your answers (lizm@cannoncorp.us).

I’d like to hear more about .....  
Accident Investigation  
Air Monitoring Instrumentation  
Asbestos Safety Awareness  
Flow Meters, Calculations  
Maintenance Management  
Motors, Induction: Repair, Maintenance, and Operation  
Pumps and Pump Motors, Seals, Packing  
Welding awareness, practices, procedures, safety  
ARC Flash

2. I’d like the presentation to be in the following format:  
   PowerPoint  
   Question and Answer  
   Hands-on Workshop Style  
   Interactive Dialogue

3. I attended the ARC Flash Training in March:  
   Yes  
   No

   **If yes:**

4. Could you hear the speaker?  
   Yes  
   No

5. Did you like the visuals?  
   Yes  
   No

6. Do you have suggestions for future trainers to improve their training programs for you?

7. Do you know any trainers that would like to be at one of our upcoming workshops?

Thanks for your feedback! Liz Moody
The Baby Boomers: Are You One Of Them?
Young and Young at Heart

I know I am one of the 79 million baby boomers. One of those people trying to reflect on what they have accomplished, where they are going and what they hope they can still do.

But this batch of people who lived in the era of “sex drugs and rock and roll” have quite a different agenda now. They have done their share in this life, spent time working and raising their kids and achieved the American dream. Now is the time for them to retire and enjoy life and have fun. Those that have prepared for retirement, fulfilled their appetite for expensive cars, electronic toys, traveling, putting adventure back in their life, buying second homes or going back to their homeland to enjoy a pampered life, or to fulfill the bucketlists before they kick the bucket!

Boomers are also reinventing themselves, about 50% change their spouses or change their religion. About 70% feels they are younger than their age, and about 60% feels they are still at their prime. Having this state of thought, staying healthy is the number one item in their list followed by reconnecting with spouses, kids, grandkids, and friends. 62% of married couples would like to spend quality time with their spouses.

Some 48% Boomers that are still in the work force would like to work less, and about 70% of retirees want to continue working even if they don’t need to for some financial reasons or because of boredom. After a year of being retired Boomers get weary of their idleness and get tired of working around the house and they’ll go back to work.

“Choose a job you love, and you will never have to work a day in your life”

THE QUIZ CORNER

By Jim Langley
TCP Chair/Treasurer

A five-year old pump motor is scheduled to be replaced with a new motor that costs $18,950. If your approval to purchase is contingent upon a payback period of less than 2.5 years, will you be able to justify the purchase? Both the old and new motor would operate at 185 hp output and like the old motor the new one would operate 75% of the time. The existing motor efficiency is 85% and the new motor will operate at 94% efficiency. Power cost is $0.081 per KWh.

A 3-meter belt press operates 8 hours per day to dewater anaerobically digested sludge. The feed sludge (4.3% TS) is treated with polymer and fed to the belt press at a rate of 105 gpm. The press produces an average wet cake of 17.5% with a bulk density of 59.4 lbs/ft³. If the capture rate is 98%, how many truckloads per day are required to haul all of the biosolids produced each day to the reuse site? Truck capacity is 10 yards.

How many pounds of dry polymer must be added to 100 gallons of water to make a 3% solution of polymer?

Answers on page 18
CWEA Study Guides
Selecting the Right One for You

There are study guides for each vocation, with many offering separate guides for each grade level.

- **Collection System Maintenance Study Guides**
  These are for preparation for the Collection System Maintenance certifications. There is a guide for each grade level, so be sure to get the correct guide.

- **Laboratory Analyst Study Guide**
  These are for preparation for the Laboratory Analyst certifications. There is a guide for each grade level, so be sure to get the correct guide.

- **Environmental Compliance Inspector Study Guides**
  These are for preparation for the Environmental Compliance Inspector certifications. There is a guide for each grade level, so be sure to get the correct guide.

- **Plant Maintenance Study Guides**
  These are for preparation for the Plant Maintenance Grades 1 and 4 certifications. If you are studying for a Grade 4 you may want to get a Mechanical Technologist or Electrical/Instrumentation Grade 3 study guide as well since this material is covered in the test.

- **Mechanical Technologist Study Guides**
  These are for preparation for the Mechanical Technologist Grades 2 and 3 certifications. Mechanical technology is a specialty in the Plant Maintenance Vocation. These guides are also good for preparing for the Mechanical portions of the Plant Maintenance Grade 4 test.

- **Electrical/Instrumentation Study Guides**
  These are for preparation for the Electrical/Instrumentation Grades 2 and 3 certifications. Electrical/Instrumentation technology is a specialty in the Plant Maintenance Vocation. These guides are also good for preparing for Electrical/Instrumentation portions of the Plant Maintenance Grade 4 test.

- **Industrial Waste Treatment Plant Operator**
  There is only one guide for this vocation. It covers all four grade levels.

CWEA member benefits will now include downloadable study guides for free. http://www.cwea.org/cert_howcert_studyguides.html

This benefit is now available to all new and current members.
In Memory of Victor Acosta
Goodbye to a fellow Wastewater Professional

Victor Acosta was called by the Lord to be with his Creator on February 11, 2012. He lived in Santa Barbara County and dedicated 37 years of his life working in the Water Environment profession. Victor was committed to his profession from 1972 until 2009 when he retired as the Superintendent of the City of Santa Barbara El Estero Wastewater Treatment Plant.

Victor was a dedicated CWEA member and had been very active in the Tri Counties section. He was a past Tri Counties section president and Turkey of the Year in 1984.

Victor was an admirable man, an outstanding and well-respected manager, and a devoted husband, father and grandfather.

Victor will be truly missed by all who knew him.
Carpinteria Sanitary District hosted the March Workshop on March 15, 2012. While the Ides of March may have been a really bad day for Caesar, it was a great day for a workshop! There were many interesting sessions to attend from math to safety and collections to environmental compliance; the day was filled with lots of learning opportunities. Chuck Beatle presented a session on Arc Flash that was nearly standing room only, obviously a hot topic for plant electricians, instrumentation technicians, and maintenance workers. Our Supergroup presented two great sessions, one on the keys to success and another discussing anger management. Both sessions were given rave reviews by those who attended. Anaerobic Digestion and BNR were covered in the afternoon operations sessions. Sampling and testing procedures were covered, along with infiltration and inflow. And who can’t use more information about Automated External Defibrillators (AED)? All in all, there was a great variety of classes to meet the needs of the many disciplines involved in protecting our valuable water resources.

The workshop also heralded the return of the Operator’s Challenge. The last few March Workshops had been missing this fun and challenging event. But it’s back! Thanks to the skill and labor of Bill Farrell and Robert Wernke from the Simi Valley Water Quality Control Plant the equipment used for the Challenge has been completely refurbished and is in tip top shape. Thank you to all those who participated, from the competing teams to the outstanding judges, for making this event successful.

Congratulations to the winners: First Place Team – Plumbers Depot; Second Place – Simi Valley.

Of course any mention of our workshops isn’t complete without a huge THANK YOU to our amazing vendors, without their continued support we’d never be able to offer our training events at a very affordable price. We appreciate that our workshop attendees take the time to check out what the vendors are offering and spend a little time chatting with them. As you already know, they’re a fun bunch of guys and gals! Whenever you are able encourage those in your organization to purchase from our vendors.

Let’s not forget the food – YUM! As always, lunch was fantastic and so hard not to go back for seconds. The Iron Chef from Goleta Sanitary District catered the workshop serving up a delicious barbeque with all the fixings.

It was great to see everyone, watch the Operator’s Challenge, and enjoy the classes and the food. June is just around the corner; hope to see you all at the Plant of the Year Workshop.

GOLETA SANITARY DISTRICT

WASTEWATER TREATMENT PLANT OPERATOR
GRADE III

$29.60—$37.78 per hour

Under direction from the Operations Supervisor, is responsible for the Operation and Maintenance of an activated sludge wastewater treatment and reclamation facility in compliance with state regulatory agency requirements. Performs a variety of skilled technical duties, including laboratory analysis, facility maintenance, and process control decisions.

MINIMUM QUALIFICATIONS

Experience as a grade III wastewater treatment plant operator, ability to operate and maintain a full range of equipment commonly found in wastewater treatment plants; knowledge of methods of treatment processes used in a grade IV treatment plant. Possession of a Grade III Wastewater Treatment Plant Operator Certificate issued by the CA. Water Resources Control Board. Possession of a valid California Class C Driver License with a satisfactory Driving Record. Possession of a CWEA Laboratory Technologist Grade I, is highly desirable.

APPLICATION DEADLINE: Open until Filled

Please send application to grazo@goletasanitary.org

For applications, or additional information on responsibilities, certifications, and qualifications obtain a job description from the District Office at:

1 William Moffett Place
Goleta, CA, 93117
(805) 967-4519

CITY OF CAMARILLO

WATER RECLAMATION PLANT MECHANIC I/II

SALARY I: $22.33 – $30.12/HOURLY
SALARY II: $24.92 – $33.61/HOURLY

Performs various semi-skilled and skilled mechanical duties involved in the installation, maintenance, and repair of the City’s reclamation plant facilities and equipment including pumps, motors, generators, control equipment, chemical equipment, hydraulic controls, compressors, conveyors, diesel and gas engines, piping, all safety equipment, and related equipment; inspects water reclamation systems plant and equipment to locate needed repairs and required maintenance; reports findings and suggests repairs and maintenance to supervisor. Installs, inspects, monitors, maintains, repairs, and adjusts a variety of mechanical equipment at the water reclamation plant; upgrades and modifies equipment as needed including fabrication and rebuilding of shop, field, and plant equipment. Installs, inspects, maintains, and repairs a variety of pumps including centrifugal, positive displacement, and screw; services, lubricates, and adjusts chemical feed and processing equipment; inspects and repairs tertiary filter system; determines excess wear and pump efficiencies; monitors equipment for preventive maintenance; performs field service work as needed; recommends equipment for replacement.

EDUCATION/QUALIFICATIONS:

I. Equivalent to the completion of the twelfth grade. One year of experience in the maintenance and repair of mechanical equipment. Experience in the maintenance and repair of equipment used in water reclamation systems is desirable. II: Equivalent to the completion of the twelfth grade supplemented by specialized course work or training in the installation, maintenance, and repair of reclamation plant facilities and equipment. Two years of experience in the installation, maintenance, and repair of water reclamation systems comparable to a Water Reclamation Plant Mechanic I with the City of Camarillo. Possession of a Grade II Mechanical Technologist certificate issued by the California Water Environment Association. Possession of a valid California driver’s license at a level appropriate to the equipment operated.

APPLICATION PROCEDURE:

To be considered for this position, please submit City application and supplemental questionnaire to:

Human Resources Department
City of Camarillo
601 Carmen Drive
Camarillo, CA 93010
(805) 383-5618

RECRUITMENT SCHEDULE:

City application and supplemental questionnaire must be received by:
5:00 P.M., FRIDAY, APRIL 27, 2012
No facsimiles, emails or postmarks accepted.

To have an application mailed, please call (805) 383-5618 (leave message). The application and supplemental questionnaire can also be downloaded at www.ci.camarillo.ca.us.
The Supergroup Committee had a great speaker for the March Workshop, Dr. Lisa Love, presented a great topic on “Feeling Good, Living Good in Good Times and Bad Times and also on the topic of Anger Management”. The classroom was packed, mostly by women but there were also a few men who showed real interest in the topic. Dr. Lisa Love pointed the importance of how handling any feelings well help you live a better life and that we should seek to live with greater love, clarity, compassion, energy, fulfillment, and joy! Dr. Lisa Love is the best-selling author of “Beyond the Secret” and a counselor with five degrees in Marriage, Family, Child Counseling, Spiritual and Transpersonal Psychology. Our sincere thanks to Dr. Lisa Love for her support of CWEA and for her very informative class. You can contact her at www.doctorlisalove.com

You are cordially invited to attend the Plant of the Year Workshop in Simi Valley Water Quality Control Plant on June 14, 2012. There will be great classes, hands on training and review sessions. The Supergroup Committee will feature the topic “Employee Motivation”. Our guest speaker is from the City of Los Angeles, the Assistant Director of the Bureau of Sanitation. He is an excellent speaker with passion for quality excellence, and leadership management. He has taught various courses in Total Quality Management at the University of Phoenix. He also taught various courses in wastewater treatment technology at Los Angeles Technical College. Mr. Varouj Abkian is a popular speaker for the Super Group Committee, He had presented very informative topics for CWEA such as “Leadership: Time Management and Life Management” and “Interviewing Skills”. Don’t miss his class, I guarantee that you will learn a lot and take with you tons of information. Look forward on seeing you at the Plant of the Year workshop!
Be prepared for your Certification Exam

Offering Top Quality Instruction in:
~ Grades 1 - 5 Math Review and Operator Certification Review
~ Advanced Activated Sludge Process Control and Optimization
~ Activated Sludge Process and Biological Nutrient Removal
~ Mesophilic/Thermophilic Anaerobic Digestion

Instructor Eric Wahlberg holds a Masters and Ph.D in Environmental Systems Engineering, and has over 20 years experience in the industry. He also earned a Class A Wastewater Treatment Operator’s License in the state of Colorado. He has many years of experience teaching wastewater math.

Has your Gravity Flowline subscription expired?

**NEW SUBSCRIPTIONS:** The State CWEA collects local membership dues on behalf of local sections. Members of CWEA will be contacted regarding membership expiration. Subscriptions are automatically renewed after dues are paid. If you do not hear from CWEA before your membership expires, please contact the State CWEA Office at 510-382-7800 for the status of your membership.

**NON-MEMBERS:** A non-member subscription is $16 per year. Complete this form and submit it along with your check to the address below. Indicate your delivery address. CWEA members who are not Tri-Counties Section members may get a subscription for $12.
