Emotional Intelligence: The Key to Successful Leadership
Monday, February 2 1:30-4:25 PM

What does the leader of your future look like? A significant number of newer and younger leaders do not have the skills and personal qualities to take on the demands of the 21st Century. A recent study found that nearly one-third of current managers and leaders lack management abilities. Many struggle at their jobs not because of problems with the task, knowledge, or strategy. They struggle because they lack interpersonal skills. They have poor working relations, low adaptability, and the inability to build effective teams. These derailers describe personal and interpersonal skills that are outside the realm of their technical skills. Successful leaders have high EQs (Emotional Intelligence or Quotient) which is the ability to effectively manage their own emotions and the emotions of others while building effective teams.

After attending this session, the participant will be able to:

- Define and describe emotional intelligence and how it is critical to successful leadership.
- Identify common leadership derailers and how to overcome them.
- List, discuss, and practice six common EQ traits that are strong predictors of leadership.
