California is Counting on Us

43rd Annual Pretreatment, Pollution Prevention and Stormwater Conference

RIVERSIDE CONVENTION CENTER
FEBRUARY 29 to MARCH 2, 2016
www.P3S16.org
“EEC brings unique technical expertise to our projects and provides practical solutions for our agency, our satellite agencies, and our industries.”

“EEC's diligence for following up on project tasks helped the project progress smoothly and come in ahead of time and under budget.”

“EEC has played a significant role in helping our City protect the environment and our citizens.”

EEC has provided industrial pretreatment consulting since 1995.

What can EEC do for you?

• Sewer Use Ordinance Development
• 40 CFR 403 Compliance Assessment
• IU Permitting, Inspection, and Enforcement Support
• Local Limits Development
• Audit Preparation and Post Audit Corrective Actions Support
• Program Documents Development
• SOP Development Training
• Sewer Collection System Services
• Data Management
• Geographic Information Systems

P3S PROFESSIONALS ARE ESSENTIAL TO PROTECTING OUR WATER RESOURCES

On behalf of the 2016 Pretreatment, Pollution Prevention & Stormwater (P3S) Conference Committee, it is my honor to invite you to attend the 2016 CWEA Annual P3S Conference at the Riverside Convention Center.

The theme of this conference is “Protecting our Precious Resources”. The conference provides attendees essential training, and information on critical updates and new developments in the water and wastewater industry.

The P3S Conference Committee has always worked diligently to develop training sessions that will benefit attendees ranging from entry-level field staff, to seasoned veterans and managers.

As a representative of Riverside I encourage everyone to come and explore our beautiful city. I look forward to meeting everyone at the Riverside Convention Center.

Sincerely,

Abigail Gomez
P3S Executive Committee Chair
City of Riverside

Abigail Gomez
Chair, P3S Committee
Environmental Compliance Inspector, City of Riverside

All Things Water

From coast to coast, we help clients improve the resiliency of watersheds and turn nutrient removal into nutrient recovery, waste into energy, discharge into reuse – recharging and replenishing our water systems to provide sustainable supplies for future generations.

If you're trusted to protect public health and the environment, we can help.
MESSAGE FROM THE MAYOR

WELCOME TO RIVERSIDE

It gives me great pleasure to welcome the California Water Environment Association P3S Conference to Riverside. As a native of Riverside, I have witnessed the growth and evolution of our city throughout the years, and I can tell you with confidence that there has never been a better time to be in Riverside!

For years, we have invested wisely in our historic landmarks, libraries, schools, recreational facilities and shopping areas to make Riverside a great place to live and a wonderful destination to visit. I invite you to experience the fruits of that investment. During your stay, visit our award-winning parks, eclectic restaurants and coffee houses, our historic downtown and our beautiful neighborhoods, all of which reflect our commitment to providing diverse, state-of-the-art facilities for our residents and visitors. You will not be disappointed!

Riverside is home to some of the top destinations in Southern California, including the world famous Mission Inn Hotel & Spa, the Riverside Aquatics Complex, the Parent Washington Navel Orange Tree, the Fox Performing Arts Center, which hosted the first showing of “Gone With the Wind,” and the beautifully renovated Riverside Convention Center in the heart of Downtown Riverside. Within a short walk, the Fox Performing Arts Center and our Riverside Municipal Auditorium are quickly becoming the focal points for live music, theater and the arts in Inland Southern California.

Live Nation, the largest promoter of live entertainment in America, is booking both of these world-class venues, providing easy access to world-class acts like Jerry Seinfeld and Willi Nelson. For outdoor enthusiasts, Victoria Avenue, Sycamore Canyon Wilderness Park and Mount Rubidoux each offer a great place to walk, ride your bicycle or even rock climb, while enjoying nature and the stunning views of our city.

So, welcome to Riverside! We encourage you to enjoy all that we have to offer. There is always something new and exciting to explore in Riverside!

With warmest regards,

Mayor Rusty Bailey
City of Riverside

Automatic Stormwater Diversion Systems

The Attitude Systems Automatic Stormwater Diversion System (ASWDS) is an automated electronic system designed to change the path of water; commonly dirty use water to one path and clean stormwater to another. This system is pre-configured for site-specific needs and is easy to install. No special engineer or contractor is required. The ASWDS requires little maintenance and comes with clear installation and configuration guides. One of the strongest advantages of this system is its configurability.

The ASWDS consists of three components: 1) A STORMSwitch to detect an event, 2) a STORMController to respond and coordinate signals, and 3) a STORMDiverter to divert the water (gate, valve or pumps).

5192 Bolsa Ave, Huntington Beach

When Trust Is Low and Emotions Are High: DEALING WITH RISKY COMMUNICATIONS

Monday 9 am to Noon
Earn up to 3 CWEA contact hours

Change is a constant reality in today’s workplace and world. Change can cause substantial psychological stress especially when a community defines risks differently than an agency or organization. Agencies, policymakers and agency staff can choose to ignore communities — which usually results in facing increased hostility. Or they can choose to interact more effectively with the public.

At the same time, this stress may become exacerbated in a workforce that is at ground zero of the environmental challenge. Likewise, that workforce may perceive agency changes as risk and become concerned about their livelihood and quality of life.

Simply making information available is not the same as communication. People under stress lose as much as 80 percent of their ability to process situations. So how do you effectively communicate when emotions are high and trust is low?

After attending this session, participants will be able to:

1. Identify how our brains are hardwired to avoid conflict and how to hardwire them to engage
2. Define risk and the key variables that underlie community and staff perceptions of risk.
3. List three critical messages needed for adult communication and dialogue
4. Discuss four primary factors that create trust and credibility

Who can benefit from improving their communication skills?

- General Managers;
- Executive Managers; PIOs;
- Environmental Compliance Inspectors; Engineers;
- Stormwater Leaders;
- Sewer System Leaders;
- Budget Analysts and more.

Bring your team and learn together!
When we perceive that trust is gone, we become someone else. We have Dr. Jekyll and Mr. Hyde moments. When fear masters us, our biology takes over and we are someone else driven by our natural internal chemistry.

When that chemistry shifts from trust to distrust, and when we feel betrayed, we don’t know how to respond appropriately and logically. This is when we as leaders lose our power. When we lose trust, we lose our voice. And that’s when we lose the collaborative spirit of our teams. It’s at this moment that we understand the true power of strategic conversations.

Conversations are not what you think they are. We think they are about talking, sharing information, telling people what to do, or telling other’s what’s on our minds. Conversations actually go deeper and are more robust than simply sharing information.

To build trust and empower others, we need to understand the three levels of conversations and how to move from power over others to power with others. It is only then that we get to the next level of greatness and change the game through conversational intelligence.

• Compare and contrast the three levels of conversations and why it’s important to move others to transformational interactions.
• Practice the steps of conversational agility.
• Define and discuss the steps of conversations to conclusions and how it applies to your work.
